

I pay for the service you are trying to take from me, it is not hurting anyone except for someone who is not making money on it, these are the only people with a problem, I don't want to wait for commercials to run to tell me about weather and traffic that is why I pay not to hear them, I think you are making a big mistake regulating radio, there must be more important things for you public officials to worry about other than the weather and traffic, please consider voting against 04-160, it is all about money, and they have enough. thank you
